HOW TO GROW BULBS

Daffodils and Crocuses may be planted in the garden between the first of September and the middle of October; Tulips the latter part of October, but should not be delayed too long if best results are desired. Early-planted bulbs come up more evenly, earlier, and develop finer flowers than those put in later. Hyacinths may be planted any time from September to December.

When grown in beds, Hyacinth and Tulip bulbs should be planted at a uniform depth. The easiest way to do this is to remove all soil from the bed to the depth required, set the bulbs as far apart as the planting-table indicates, and carefully replace the soil. Many people do not think this is worth while; they prefer to plant with a trowel or dibble. Where this practice is followed, great care should be taken to see that the base of the bulb is pressed firmly into the soil.

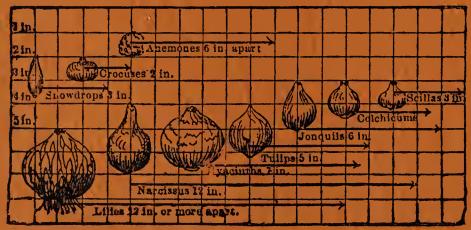

After the ground is frozen to a depth of 4 to 5 inches, it is well to put on a cover of straw or leaves. This should be removed rather early in the spring. Tulips and Hyacinths should be taken up each year. Let the foliage mature, either where they have flowered or in another location. After drying, the bulbs should be kept in a cool, dry place.

Daffodils may remain in the same place for three to four years at a time. The clumps may then be taken up and divided for replanting.

Crocuses give a delightful effect in early spring, but, like Narcissi, should not be planted where grass is kept clipped. They are extremely desirable in naturalistic plantings, but to obtain good effects it is essential that they be used in large quantities; plan to use several thousand in each 50-foot square of woodland or meadow.

Lilies demand good drainage. This may be secured by placing a quantity of sand below each bulb, or by mixing peat or humus with the soil. The tall varieties should be planted in a location where they receive protection from high winds; all of them enjoy partial shade.

Culture Indoors.—Paper-White Narcissi and the Chinese Sacred Lilies are the easiest to grow. A bowl of pebbles and water is the "garden." Hyacinths likewise present little difficulty. Place each bulb in a glass so that the base barely touches the water, and leave them in a cool, dark

Many of our customers are frequently puzzled to know proper depth and distance apart at which bulbs should be planted. The accompanying diagram conveys the information very clearly. The chart will bear careful study.

place until the roots develop. They may then be brought into the light, and will produce just as fine flowers as if they were grown in pots or outdoors. Start the bulbs any time between September and January; for succession of bloom bring them into the light at intervals of several weeks.

Bulb prices...are lower!

With the issue of this Catalog our customers have the opportunity to buy *Sterling Novelties* at the price of older, standard varieties. Buyers of large quantities of bulbs for naturalizing will be quick to seize this chance to obtain higher class varieties than are usually used for that purpose, at exceedingly attractive prices.

We have arranged to have Dutch Bulbs, ordered from us before August 1, separately packed in Holland for each customer. This expedites service and avoids both damage and loss in rehandling in this country. The bulbs will come to the purchaser in the original Holland packages.

10 PER CENT may be deducted from the amount of each purchase made from us **before July 15**, if cash accompanies the order.

A larger number of novelties and rare items are offered in this Catalog than ever before. They have been most carefully selected from the best introductions of foreign and domestic growers of high reputation. We commend them to your consideration when placing orders.

For the continued patronage and good-will of our many friends and customers, we are grateful. Knowledge and appreciation of high-grade plants, bulbs, and seeds are steadily increasing, and it is our aim to make this firm the leader in providing for this steadily advancing horticultural interest.

Early Ordering. Your coöperation is invited. Placing orders early will facilitate delivery at proper time

Rush Orders may be telegraphed or telephoned at our expense.

Prices of Bulbs, Seeds, Plants, and Supplies are subject to market and tariff changes.

Terms. Prices quoted are net and do not include free transportation, except for seeds in packets, ounces, or quarter-pounds, on which we prepay postage or express to any point in the United States.

Upon delivery of goods to the carrier, ownership passes to the purchaser; when the carrier issues a receipt our responsibility ceases. Claims for damage should be made to the transportation agent at point of delivery.

Non-Warranty. William M. Hunt & Company, Inc., give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs, or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are to be returned at once.

Darwin Tulips

Undoubtedly, Darwin Tulips are increasing in popularity every season. The colors range from white to purplish black, including shades of crimson, violet, brown, rose, etc. Very effective for planting in shrubbery or in hardy plant borders. The flowers are large, deeply cupped, and are borne on lofty stems which are ideal for cutting and vase use. Gorgeous combinations of color can be made by planting them in broad masses or long, narrow borders. To avoid striking contrasts, use tones of bronze and pale violet with the lavenders—and soft pinks and lavenders, shades which merge into each other and do not clash as violently as the usual red and yellow. If striking effects are desired, try Bleu Aimable in front of City of Haarlem, a vivid, odd, French combination of blue and scarlet; or an even more effective combination of some pale yellow, like Flava (a Cottage Tulip) with a deep red-purple variety, Philippe de Comines or Zulu. The new pale yellows are also good with dark mahogany-red varieties like King Harold. Brilliant reds like Pride of Haarlem and Farncombe Sanders, are best used alone, or against an evergreen background. Dark pinks are good with light pinks and white varieties, like the Cottage Picotee. Those marked with * are best for forcing.

Afterglow. 26 in. Possibly the sweetest color-play found in Dar-	Doz.	100	1,000
wins—rich deep rose laid over salmon-orange, clearer toward			
the edges; inside a lovely orange-topaz sheen	\$1 00	\$5 50	\$50 00

Cottage or May-flowering Tulips

The largest flowers of any Tulips are found in this class, which contains many long-pointed and lily-shaped flowers. All colors imaginable are available among them, except good blues. Many have long stems and some are shorter and some gracefully drooping so that they are excellent in front of taller sorts. They are splendid for cut-flowers and are unsurpassed for garden decoration.

Alaska. 28 in. Long canary-yellow petals with butter-colored	Doz.	100	1,000
base, opening to an enormous flower of star-like shape	\$1 00	\$6 50	\$60 00
Ambrosia. 25 in. Superb salmon-orange inside, with yellow and			
green patterned base; outside color subdued lilac-rose, with			
gay edging of bright coral or luminous apricot. A stunning,			
wide-open cup of unusual size	1 00	5 50	50 00
Avis Kennicott. 24 in. Long chrome-yellow flower with black			
base and anthers. For bedding	1 00	5 50	50 00
Bouton d'Or (Golden Beauty). 20 in. Sunflower-yellow. Ex-			
cellent cut-flower of cup form	75	4 50	45 00
Carrara. 24 in. Graceful, fairy snowballs on light green stems.			
Pure white, no other tints. Large, rounded cups. Does very			
well in pans in the greenhouse for middle-March blooms	1 00	6 50	60 00
Dido. 28 in. In Dido the body-color is a deep coral-pink, edg-			
ing into light orange; the inside is like costly silk, flaming			
orange with green and yellow base. Full-blown flowers are			
$3\frac{1}{2}$ inches deep and of captivating beauty \dots	1 00	6 50	60 00
Dulcinea. 28 in. An extra-early forcing variety. Glowing			
orange-red, with yellow and greenish base	1 00	5 50	50 00
Fairy Queen. 25 in. Violet-lilac, broadly margined coppery			
yellow. Perfectly formed flower and one of the most hand-			
some varieties for bedding	75	4 50	40 00
Gesneriana lutea. 26 in. Lemon-yellow, inside buttercup-yel-			
low. Fine. Sweet-scented	75	4 50	40 00
Grenadier. 21 in. Flaming orange; very large flower of lily-like			
form	1 00	5 50	50 00
Inglescombe Pink. 25 in. Delicate rose-pink, tinted salmon;			
blue center. An exceedingly useful and delicately lovely			
variety, especially if grown in partial shade	75	4 50	40 00

Breeder Tulips

These are the old Dutch self-colored Tulips, neglected for many years, which modern taste for unusual colors has called into prominence once more. Nature's happiest color-combinations of purple and bronze, gray and lilac, brown and orange, are revealed to us in this group. The flowers are mostly large, of perfect form, and are borne on tall, strong stems.

Parrot Tulips

Single Early Tulips

The old-fashioned Single Early Tulips are unsurpassed for bedding and, with few exceptions, excellent for forcing. Gardeners are learning that the wholesale discarding of this class, which took place a few years back, was a mistake. The monotony of the solid beds of red and yellow, and the acres of Keizerskroon which used to make our parks and gardens offensive, will never return, but such lovely things as De Wet, Lady Boreel, Pink Beauty, President Lincoln, and Rose Luisante are indispensable in any well-planned garden. Blooming with the narcissus, at a time when bright color is sorely needed, they are treasures indeed. And the handsome thing about them is that they are gone by the time the space is needed for annuals and bedding plants, so that there is no blank interval in the effective use of the ground.

SOMETHING NEW!

Pre-cooled Bulbs for Christmas and Early Flowering

New York florists have displayed flowers of Wedgwood Iris and King Alfred Narcissus all through the month of December. These flowers were obtained from greenhouses on Long Island and coldframes in the Carolinas, and were the result of

forcing Pre-cooled Easter-grown Bulbs.

This stock is dug as usual, cured for two to three weeks, graded and then placed in a temperature of 50° Fahr. from six to eight weeks. Storage at this temperature makes normally late-flowering varieties early and early sorts much earlier, and easier to force; in fact, they require only six to eight weeks from planting to full bloom.

We offer Extra-Quality Pre-cooled Bulbs as follows, and suggest carly	y orde	ring:
	100	1,000
Iris, Wedgwood. Large; blue	\$13 00	0 \$120 00

Early Roman Hyacinths

The early Roman Hyacinth, with its graceful spike of fragrant bells, is one of the

earliest of all winter-flowering bulbs.

New-crop bulbs will be ready in September, when they may be planted in pots or pans of a compost containing two-thirds fibrous loam and one-third sand. They may also be placed in the more artistic ornamental bowls now available in any china store, using our prepared Bulb Fibre as a filler, which only needs to be kept continually moist, requires no additional fertilizer, and in which the bulbs thrive and bloom luxuriantly. Bulbs planted in September bloom in December.

Prepared Dutch Hyacinths

These bulbs are intended only for indoor planting and have, both in growing and harvesting, been submitted to a treatment that insures early ripening and leaves them in a condition to respond to intense forcing methods for early bloom. Planted in September, they bloom about the same time as the Roman Hyacinths, or soon after them.

Bulb Fibre. A natural peat fibre, full of nutritious properties for the growing of flower bulbs indoors. This compost acts as a moisture-retainer, which promotes the growth of roots on the bulbs, at the same time releasing its organic fertilizing elements in soluble form, developing and maintaining a steady and sturdy growth on the bulbs until the flowers have matured. Peck \$1.75, bushel \$6.50.

Hyacinths for Garden and Home

Single Blue

Bismarck. Sky-blue; very large spike. Excellent for forcing.
Dr. Lieber. Lavender-blue, tinged violet; large, perfect spike.
Duke of Westminster. Large deep purplish blue bells with white center.
Grand Maitre. Deep lavender-blue; large and compact truss. Old popular variety.
King of the Blues. Compact truss of dark blue bells. Late variety.
Lord Balfour. Lilac-rose, tinged violet—a very pretty combination.
Menelik. Purplish black; large, compact truss. Very distinct.
Queen of the Blues. Pale azure-blue; large spike. Beautiful.
Schotel. Light blue; long, perfect spike. Good forcer.
Sir William Mansfield. Bright purple; good truss.

Single Yellow

City of Haarlem. Pure yellow; large truss. Extra-fine exhibition variety. Yellow Hammer. Rich yellow; beautiful truss.

Single White

Arentine Arendsen. Pure white. Extra early.
Grande Blanche. The best blush-white; perfect florets on long spike.
L'Innocence. Pure white. The best white for all purposes.
La Grandesse. Pure white; fine bells. Best exhibition white variety.

ROYAL SCARLET

A medium-sized spike of fiery scarlet. This very brilliant variety was greatly admired at our booth at the recent International Flower Show in New York. Top-size bulbs only. 35 cts. each, \$3 per doz., \$20 per 100.

Single Red and Rose Hyacinths

Garibaldi. Glowing crimson-red. Very early.
Gertrude. Rosy pink; large, compact truss. Old and still popular.
Lady Derby. Rose-pink; large spike. Excellent for pots.
La Victoire. Deep carmine-rose; very fine spike. Splendid for exhibition.
Marconi. Bright rose; large, compact truss.
Queen of the Pinks. Rosy pink; extra-large bells. Perhaps the best of this shade.

Freesias

New-crop bulbs will be ready in July, and if potted at once and kept in a coldframe until leaves are well developed and then brought in and not forced, they can be bloomed early for Christmas.

Hardy Garden Lilies for Fall and Spring Planting

Hardy Lilies are among the most gorgeous subjects for the garden that can be planted. When happily placed they throw up sturdy stems in an eager desire to unfold their wonderful flowers above the heads of their companions, holding the admiring gaze

of all who pass.

All Lilies do not like the same conditions. The one universal requirement for all is absolutely perfect drainage. The loose, scaly bulbs which Lilies produce are susceptible to rot in wet soil, and it will pay to go to some pains to be sure that the ground for them is properly drained. When Lilies are well established in the garden, it is well to feed them with a top-dressing of manure after the tops have died down in the autumn. It is

better to omit manure from the preparation of the Lily-bed before planting.

Some Lilies make two sets of roots, one set below the bulb which nourishes and stores up the food for next year's flowers, and another set above the bulb which supplies moisture and soil-elements for this year's flowers. The bulbs of such Lilies in their natural homes are usually found very deep in the soil. In planting in the autumn, it is wise to set such Lilies 6 to 8 inches deep. However, since the roots of Lilies have strong, contractile power, they will seek their own level eventually, so that errors in the depth of planting will be corrected by the Lilies themselves.

Another group of Lilies makes no stem-roots at all. These bulbs should not be put down more than twice the depth of the bulb itself.

down more than twice the depth of the bulb itself.

Almost all Lilies need a mulch, either of leaves or some living plant, to protect the base of the stems from the summer sun. A few of them do very well when interplanted with low shrubs, such as rhododendrons and azaleas. Almost all of them will benefit by giving the tops plenty of sky-room, so that the flowers can have sunlight.

The most beautiful Lilies are Lilium auratum, L. regale, L. speciosum, varieties

Melpomene and Album, L. tigrinum, and L. Henryi.

Auratum (The Golden-banded Lily of Japan). One of the stateliest of all the hardy Lilies; grows 3 to 6 feet high and bears twenty or more large and fragrant flowers 8 to 10 inches in diameter. Planted in clumps of six or so, they make an attractive sight.

Regale. 3 to 4 ft. The finest and most easily grown is the Lily producing		
large, flared trumpets suffused with gold and yellow on the inside and		
slightly stained with purple on the backs of the outer petals. The stem		
is stout and very wiry, so that the plant takes up very little room after		
flowering. It blooms immediately after the Madonna Lily and is one		
of the finest plants to be found in gardens.

Miscellaneous Bulbs for Spring Flowering

AMARYLLIS. For growing in the house or conservatory, few plants produce as striking a display, with so little trouble, as Amaryllis. The bulbs should be potted in the fall, be kept rather dry all winter until growth starts in early spring, when they should be watered plentifully, fertilized and lightly shaded. A few weeks, and they break into immense lily-like blooms of gorgeous color and form.

Vittata Hybrids. This selection contains a mixture of the finest unnamed Each seedlings in cultivation. The colorings and markings are unique and provide a show of unexampled beauty. Extra-large, sound bulbs of

ANEMONE. Gorgeous, whirled flowers of brilliant colors—scarlet, blue, pink, white, etc.—with strongly contrasted centers. They are splendid cut-flowers and make a fine showy bed. In most sections the bulbs need about the same protection afforded pansies. They can be kept in a frame over winter and be moved into the garden

MISCELLANEOUS BULBS, continued

MISCELLANEOUS BOLDS, continued
CHIONODOXA. Lovely blue and lavender flowers much like scillas, except that the flowers are held erect, and are useful for the same purposes. Doz. 100 1,000 Luciliæ (Glory-of-the-Snow). Blue with white center \$0 40 \$1 75 \$15 00 Sardensis. Intense bright blue
CYPRIPEDIUMS (Native Orchids or Ladyslippers). These hardy plants require acid soil and partial shade. The delicate blooms have a large, pouched petal or "lip," forming the "slipper," with curiously curled standards or waved perianth of petals and sepals behind it, usually of contrasting colors.
Acaule. Broad leaves, with a single stem between them, bearing a large Doz. 100 pink flower. Strong acid soil, a somewhat dry situation, and plenty
of shade. One of the loveliest. 3 to 4 crowns
Acid soil, moist ground, and shade. 3 to 4 crowns 6 00 40 00 Spectabile (The Queen's Orchid). Similar to Pubescens in habit, with larger flowers. Pouch rose-red or white, stained rose. The hand-
somest native Orchid. 3 to 4 crowns
DIELYTRA (Dicentra) Spectabilis (Bleeding-Heart). Not a bulb, but strong roots which produce lovely foliage and long racemes of pink, heart-shaped flowers in May. Especially valuable for shady places and for forcing
EREMURUS. Extremely rare plants of liliaceous habit, throwing up lofty stems bearing tremendous spikes of lily-like flowers. The fleshy, spider-like roots should be planted in a sheltered place, because the new growth is susceptible to damage by late spring
frost and ought to be left undisturbed, as they improve with age. Each Doz.
Bungei. Deep yellow flowers
Elwesi. Soft pink
Himalaicus. White flowers with golden anthers
Robustus. Rosy pink
FRITILLARIA. Closely related to lilies; should be left undisturbed for years.
Doz. 109.
Imperialis aurora (Crown Imperial). Orange flowers
GERBERA. Plants for greenhouse culture. June and July delivery. Each Doz.

in September to November. Graceful flowers with perfume
similar to Freesias

Prepared Gladiolus for Early Forcing Delivery October 1

Excellent results have been obtained from the following varieties for indoor forcing. They flower at Christmas and early in the spring. These bulbs are grown in the Southern States, cured in July, and are ready for planting about the end of September. Our list is somewhat limited, but we give a selection that is in great demand.

Iris (Fleur-de-Lis)

Dutch or Holland Iris

Iris Tingitana and Spanish Iris may be grown both in and outdoors. If planted indoors they should not be forced as they will be apt to come blind; given a slow treatment they will bloom without difficulty in the early spring.

Supreme Blue (Tingitana). This new variety is claimed by the originators to be the best Iris for early forcing extant. \$3 per doz., \$18 per 100.

Imperator. Early-flowering. Brilliant blue, large and well-shaped flowers on long, strong stems. \$6.50 per 100, \$60 per 1,000.

David Bless. A very early blue variety. \$1 per doz., \$7 per 100.

Wedgwood. Very early, large blue flowers borne on long, strong stems. Splendid for greenhouse, flowering in March. \$2 per doz., \$12 per 100.

DUTCH or HOLLAND IRIS, continued

Albert Cuyp. White with yellow blotch. Anton Mauve. Soft lilac-blue.

Frans Hals. Creamy yellow, shaded light

Hart Nibbrig. Bright, clear blue.

Hobbema. Pure white with yellow falls, shaded light blue.

Rembrandt. Early. Deep blue, orange dots. Yellow Queen. Fine-shaped flower of uniform golden yellow.

Any of the above varieties, \$1 per doz., \$7 per 100

Spanish Iris

Cajanus. Very fine canary-yellow. King of the Blues. Deep blue. King of the Yellows. Bright yellow.

King of the Whites. Pure white. Prince Henry. Beautiful shade of bronze. Queen Emma. Deep yellow.

All named varieties, \$1 per doz., \$6.50 per 100, \$60 per 1,000

SPANISH IRIS, MIXED. A fine mixture of the above varieties; suitable for bedding and cutting. 60 cts. per doz., \$4.50 per 100, \$40 per 1,000.

Hunt's Perfection Pot-Grown Strawberry Plants

Late summer planting of Hunt's Superb Strawberry plants in heavily fertilized ground insures a good crop of fruit next spring

Strawberries give the greatest yield and the largest berries when grown in rich soil; hence, no pains should be spared in preparing the bed carefully before planting, by digging or plowing deeply and turning under a liberal supply of well-rotted manure. At fruiting-time a top-

dressing of ground bone will be beneficial.

Strawberry plants should be set out in rows 2 feet apart and the plants a foot apart, cutting off all runners as they appear. The varieties we offer are all perfect flowering and therefore need no association with any other variety for perfect fruiting.

Shipping season lasts from July 15 until October. We recommend as early planting as possible to enable the plants to get established before the advent of winter.

Uniform prices for all sorts (except where otherwise quoted), \$1 per doz., \$7 per 100, \$60 per 1,000

Barrymore. The bluntly conical berries are of large size, beautiful, firm, meaty, and of rich and sugary quality. They are dark crimson in color. Midseason to late.

Brandywine. Bears great quantities of large, bright crimson berries of good quality. Demands rich soil. Midseason.

Bushel Basket. A giant in both plant and

fruit. Enormously prolific, and the fruit is of high quality. Midseason. \$1.50 per doz., \$8 per 100, \$70 per 1,000.

Charles I. Extra early, being one of the first varieties to ripen its fruit. A big cropper of evenly shaped, well-colored berries. \$1.50 per doz., \$8.50 per 100.

Chesapeake. The berries are uniform in size and shape mostly heart-shaped. Color is

and shape, mostly heart-shaped. Color is bright crimson and the flesh firm and of excellent quality. Midseason to late. \$1.50 per doz., \$8 per 100, \$70 per 1,000.

Delicious. A new medium to late variety, producing enormous crops of berries that are true to name, "Delicious." \$1.50 per

doz., \$8.50 per 100.

Edmund Wilson. The largest Strawberry in existence. Its fruit is of exceptional quality. The blunt, heart-shaped berries are of very dark color throughout and of superb flavor, ripening in midseason. The plants are exceptionally large and vigorous. \$1.50 per doz., \$9 per 100.

Early Jersey Giant. Fruit of extra-high quality, very attractive, and extremely productive. \$1.50 per doz., \$8 per 100, \$70 per 1,000.

Gandy. Berries are of the firmest texture, bright flame color, of large size, and late to very late in ripening.

Glen Mary. The large, deep rich red, broadly conical berries are very attractive, bringing top prices until the end of the season.

Howard No. 17. One of the best of the second-early varieties. Very beautiful and of high quality.

Hundred Dollar. A splendid midseason variety. Produces very large, light scarlet

berries, of high quality.

Joe (Big Joe). A midseason to late variety, fully up to Chesapeake in size, firmness, and yield, and superior to it in flavor and color

John H. Cook. In growth, constitution, and other worth-while qualities we consider this berry one of the best. \$1.50 per doz.,

\$9 per 100.

Judith. The dark red berries are large, pointed, and of a deep red color throughout, to the core. \$1.50 per doz., \$8 per 100,

\$70 per 1,000.

Marshall. Vigorous in growth, with clean, healthy foliage. Very productive under high culture. Midseason.

Hunt's PERFECTION Seeds

STRAWBERRY PLANTS, continued

Premier. Excelled by no early variety. Produces vast quantities of berries of good

size; attractive, and excellent quality.

Royal Sovereign. A well-known English variety that is used here principally for forcing, but which does equally well outdoors. Very heavy cropper. \$12 per 100.

Stevens' Late Champion. One of the most prolific and valuable of the late varieties.

Sharpless. A variety that fruits rather late in the season. Produces handsome, large berries of fine quality.

Success. All things considered, this is one of the best early varieties. Bright scarlet, slightly oblong berries with blunt end.

William Belt. Solid, deep crimson flesh.

It begins to ripen quite early and continues until almost the close of the season.

until almost the close of the season.

Everbearing Strawberries

The Everbearing varieties of Strawberries, frequently termed "Fall-bearing," have decided merit. In addition to bearing a good crop in late summer and autumn, they also give a heavy crop of fruit as early as June. In order to be sure of a good fall crop, remove all blossoms from the plant as they appear from the first to the middle of July.

Mastodon. "The Wonderberry." This is truly the largest, most delicious, and heaviest yielding of all Everbearing sorts. It outyields some of the finest June-bearing varieties during their season and continues to produce throughout the summer and fall berries of amazing size and surpassingly fine quality. \$2 per doz., \$12 per 100.

Champion. Produces dark crimson, smooth, and sweet-flavored berries. One of the most prolific sorts. \$1.50 per doz., \$9 per 100.

Progressive. The berries are smooth and uniform in size, deep crimson in color, and of superb quality. \$1.50 per doz., \$8 per 100.

SPECIAL OFFER: To encourage the planting of Everbearing Straw-berries, we will send one dozen each of the above 3 varieties, all pot-grown, for .

sinuata Hybrids, Mixed. Pkt. 10 cts.

URSINIA anethoides. Rich orange flowers with deep purple. Pkt. 25 cts., 5 pkts. \$1.

VENIDIUM fastuosum. Brilliant orange flowers with darker center. Pkt. 25 cts., 5 pkts. \$1.

Sweet Peas for Greenhouses and Early Flowering

American Novelties

Previous to offering this new strain, samples were sent to a few of the leading private specialists. All speak highly of the colors, length of stem, shape of flowers and productivity. For summer and fall sowing indoors.

Early Fancy. Color, old-rose on cream ground. Unusually large and ruffled flower on long stem, almost invariably four on each. Pkt. 25 cts., oz. \$2, 1/4lb. \$7.50.

Early Greeting. The best lavender in this group. Flowers extremely large, nicely waved, and produced in fours, well placed on long, strong stems. Pkt. 25 cts., oz. \$2, \(\frac{1}{4}\)lb. \$7.50.

Early Pride. Pure cerise of most even coloring. Flowers are large, well frilled, produced in fours on long, stiff stems. Pkt. 25 cts., oz. \$2, ½ lb. \$7.50.

Hunt's PERFECTION Seeds

Standard American Early-flowering Sweet Peas

For more complete list, see Spring Catalog

Ball's Blue. Choice blue. Pkt. 25 cts., oz. \$1. Ball's Orange. Best orange. Pkt. 25 cts., oz. \$1.50.

Burpee's Lavender. Wisteria-lavender. Pkt.

25 cts., oz. \$1. Burpee's Orange. Light shade. Pkt. 25 cts., oz. \$1.

Chevalier. Rose with lemon sheen. Pkt. 25 cts., oz. \$1.

Early Apollo. Salmon-cerise. Pkt. 25 cts., oz. \$1.50.

Early Fandango. Bright rose. Pkt. 25 cts.,

oz. \$1.50.

Early Sparkle. Scarlet-cerise. Pkt. 25 cts., oz. \$1.50. Eldorado. Tangerine-orange. Pkt. 25 cts.,

oz. \$1.

Fragrance. Clear lavender. The best lavender. Pkt. 25 cts., oz. \$2.50.

Giant Rose. Clear rose. Pkt. 25 cts., oz. \$1. Jeanne Mamitsch. Long-stemmed; rose-pink. Fine. Pkt. 25 cts., oz. \$1.

Mrs. Hoover. Long-stemmed; blue. Pkt. 25 cts., oz. \$1.

White Harmony. Standard white. Pkt. 25 cts., oz. \$1.50.

Zvolanek's Rose. Rose-pink. Pkt. 25 cts., oz. \$1.

Perennial and Biennial Flower Seeds

A FEW CULTURAL INSTRUCTIONS

The professional gardener needs no advice as to how and when he may sow Perennials, but as this catalog reaches many of our amateur friends who need and seek a little helpful

advice, we give these cultural notes to assist them.

Perennial and Biennial seeds may be sown any time from May until July, and, owing to the extreme sun heat during this season, a shaded locality must be chosen for the seed-bed.

The north side of a hedge, fence, wall, or residence will do, in ground that gets no overhead drip.

The bed may consist of pans, boxes, or flats, placed on a walk or a portion of a shady border, a "used-up" hotbed or frame. The best soil is a rich sandy loam run through a ½-inch mesh sieve. Sow the seed in rows 4 inches apart, covering the large seed with ½inch of soil, the smaller and dust-like seeds, sown broadcast, being pressed into the surface with a board. When the plants have made their second "true" leaves, transplant into other flats or beds from 3 to 4 inches apart. By August all should be ready to plant out in their permanent

positions.	0	D 77	1)m

Grass Seed Mixtures

Hunt's Perfection Lawn Seed

This mixture is well worthy the name we have bestowed upon it, and we firmly believe is destined to become the favorite Grass Seed for use where a fine lawn is of importance. It is the result of careful study and trials made during the past few years under varied conditions. Those who have tried out this seed tell us that "we have got the real goods for a perfect lawn." Lb. 60 cts., 20 lbs. \$11, 100 lbs. \$50.

Hunt's Perfection Lawn Seed contains 10 per cent South German Mixed Bent (Creeping Bent).

Prospect Park Lawn Seed

With proper care of the soil before sowing it will produce a rich, velvety lawn in six to eight weeks, which will remain green throughout the year. For making new lawns we recommend 5 bushels to the acre; 1 pound of seed will sow 250 square feet; for renovating use one-half this quantity. Lb. 40 cts., 20 lbs. \$7, 100 lbs. \$34, 1,000 lbs. \$330.

MIXTURE FOR SHADY LAWNS AND UNDER TREES. A combination of dwarf-growing grasses which thrive in shaded places. It quickly produces an abundant and even growth of lovely green grass where ordinary lawn seed mixtures fail. Lb. 50 cts., 20 lbs. (bus.) \$9, 100 lbs. \$40.

Hunt's Lawn Dressing Seed

Unsurpassed for Restoring Old Lawns

Our Lawn Dressing Seed is a scientific blending of the Finest Lawn Seeds with those fertilizing elements that give nourishment to the rootlets, thus insuring perfect growth, fine texture, and deep, rich coloring. Germination and rapid growth are stimulated by its free use.

100-lb. bag, \$30; 50-lb. bag, \$16; 25-lb. bag, \$9; 5-lb. bag, \$2.50

TERRACE LAWN SEED. A mixture of fine stoloniferous grasses specially suited to terraces. Will produce a rich and lasting turf. Sow at the rate of 2 pounds per 100 square feet. This mixture is a combination of such grasses as will make a quick, strong growth taking a firm hold of the soil and prevent washing away by heavy rains. Lb. 50 cts., 20 lbs. \$9, 100 lbs. \$40.

TENNIS-COURT MIXTURE. Will make a firm, green and lasting turf in the shortest possible time, that will improve with trampling. Lb. 75 cts., 20 lbs. \$12, 100 lbs. \$55.

SEASHORE MIXTURE. This mixture is peculiarly suited to seaside lawns, etc. Lb. 50 cts., 20 lbs. \$9, 100 lbs. \$40.

POLO FIELD MIXTURE. A mixture of specially selected grasses for heavy trampling that will quickly recover from hard usage. 100 lbs. \$40, 500 lbs. \$190.
